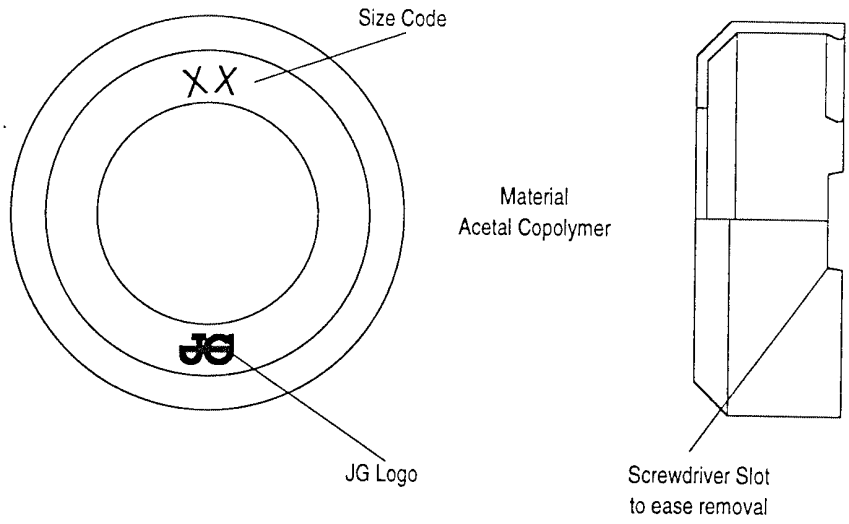
DS-PI19
Imperial Collet Covers



Application Area

The JG Imperial Collet Covers provide security against accidental pipe disconnection, they are available in several different colours which provide a means of coding. For example red and blue for hot and cold water supplies.

Technical Information

Please refer to our Customer Services Department with any further technical queries.

Connection

The cover is a press fit onto the connector and is retained in place via the groove provided.

Disconnection

Place a flat screwdriver blade in the slot provided and carefully lever off.
N.B. Screwdriver slot yet to be introduced on 5/32" and 3/16" products.
